Nonregistrability of Misleading Geographic Indications--Amendment of the Trademark Act by the North American Free Trade Agreement Implementation Act

Article 1712 of the North American Free Trade Agreement (NAFTA) requires the United States, Canada and Mexico to prohibit the use or Trademark registration of geographical indications in connection with goods that do not originate in the indicated territory, region or locality, if the public would be misled as to the geographical origin of the goods.[1]

President Clinton signed the "North American Free Trade Agreement Implementation Act," Public Law 103-182, 107 Stat. 2057, on Dec. 8, 1993. The legislation. amending Sections 2(e), 2(f) and 23(a) of the Trademark Act, applies to applications filed on or after Dec. 8, 1993, and took effect on Jan. 1, 1994. The Act, entitled "An Act to provide for the registration and protection of trademarks in commerce, to carry out the provisions of certain international conventions, and for other purposes," approved July 5, 1946, commonly referred to as the Trademark Act of 1946, has been amended as indicated. Amendments are shown in italics:

I. Subsection 2(e) (15 U.S.C. 1052(e)):

"(e) Consists of a mark which (1) when used on or in connection with the goods of the applicant is merely descriptive or deceptively misdescriptive of them, (2) when used on or in connection with the goods of the applicant is primarily geographically descriptive of them, except as indications of regional origin may be registrable under section 4, (3) when used on or in connection with the goods of the applicant is primarily geographically deceptively misdescriptive of them, or (4) is primarily merely a surname."

II. Subsection (f) (15 U.S.C. 1052(f)):

"(f) Except as expressly excluded in paragraphs (a), (b), (c), *(d), and (e)(3)* of this section, nothing herein shall prevent the registration of a mark used by the applicant which has become distinctive of the applicant's goods in commerce. The Commissioner may accept as prima facie evidence that the mark has become distinctive, as used on or in connection with the applicant's goods in commerce, proof of substantially exclusive and continuous use thereof as a mark by the applicant in commerce for the five years before the date on which the claim of distinctiveness is made. *Nothing in this section shall prevent the registration of a mark which, when used on or in connection with the goods of the goods of the applicant, is primarily geographically deceptively misdescriptive of them, and which became distinctive of the applicant's goods in commerce before the date of the enactment of the North American Free Trade Agreement Implementation Act."*

III. Section 23(a)(15 U.S.C 1091(a)):

"(a) In addition to the principle register, the Commissioner shall keep a continuation of the register provided in paragraph (b) of section 1 of the Act of March 19, 1920, entitled "An Act to give effect to certain provisions of the convention for the protection of trademarks and commercial names, made and signed in the city of Buenos Aires, in the Argentine Republic, August 20, 1910, and for other purposes", to be called the supplemental register. All marks capable of distinguishing applicant's goods or services and not register herein provided, except those declared to be unregistrable under subsections (a), (b), (c), *(d), and (e)(3)* of section 2 of this Act, which are in lawful use in commerce by the owner thereof, on or in connection with any goods or services may be registered on the supplemental register upon the payment of the prescribed fee and compliance with the provisions of subsections (a) and (e) of section 1 so far as they are applicable. *Nothing in this section shall prevent the registration on the supplemental register of a mark, capable of distinguishing the applicant's goods or services and not registrable on the principal register under this Act, that is declared to be unregistrable under section 2(e)(3), if such mark has been in lawful use in commerce by the owner thereof, on or in connection with any goods or services, since before the date of the enactment of the North American Free Trade Agreement Implementation Act."*

A mark which is unregistrable on the Principal Register under 2(e)(3) of the Trademark Act, as amended, on the ground that it is primarily geographically deceptively misdescriptive of the goods or services, may be registered under 2(f) only if it became distinctive of the goods or services in commerce before December 8, 1993. Similarly, such a mark, capable of distinguishing the applicant's goods or services, may be registered on the Supplemental Register only if it has been in lawful use in commerce by the owner since before December 8, 1993. A mark that is unregistrable under 2 (e)(3) because it contains matter which is primarily geographically deceptively misdescriptive of the goods or services will not be rendered registrable by a disclaimer of the geographically deceptively misdescriptive component. Matter which is primarily geographically deceptively misdescriptive may be omitted or deleted from the drawing in appropriate cases.

Notice of Examination for Registration Wednesday, November 2, 1994

Pursuant to the provisions of 37 CFR §§ 10.5, 10.6 and 10.7, an examination for persons seeking registration before the U.S. Patent Trademark Office as patent attorneys and agents will be held on *Wednesday, November 2, 1994*. The deadline for filing applications along with the *$300.00* examination fee and all necessary showings required by 37 CFR § 10.7(a) and (b) is *August 1, 1994*.

With the exception of those persons who actively served four years or more in the patent examining corps of the U.S. Patent and Trademark Office for whom the examination may be waived, all persons who wish to become recognized to practice before the U.S. Patent and Trademark Office in patent cases must, pursuant to the above noted rules, pass the examination. Note that passing the examination does not qualify one for recognition for practice before the U.S. Patent and Trademark Office in trademark cases. Such recognition is governed by 37 CFR § 10.14 which does not require the passing of an examination.

There is no limit on the number of times the registration examination may be taken. The examination consists of two parts, a morning section and an afternoon section. To pass the examination, an applicant must pass both sections. An applicant who passes one section of the examination, but who fails the other section, will not be required to retake the section passed, *provided* the applicant takes and passes the section failed in one of the next three examinations regularly scheduled by the U.S. Patent and Trademark Office. If the applicant does not pass the section failed in one of the next three examinations scheduled, the applicant must retake both sections of the examination. No extensions of time will be granted except in extraordinary circumstances, e.g., an accident or hospitalization just prior to the examination which prevented the applicant from taking the examination.

Application forms may be obtained from the Office of Enrollment and Discipline, Suite 4B30, 2900 Crystal Drive, South Tower, Arlington, Va., by mail addressed to U.S. Patent and Trademark Office, Box OED, Washington, D.C., 20231 or by calling (703) 308-9618.

Response Requested to 1993 Patent Examiner's Action Survey

As part of the continuing quality reinforcement efforts of the Patent and Trademark Office, the Office has sent out a Patent Action Survey Form with each Patent Examiner's Office action mailed during a period of several weeks during December, 1993-January, 1994. **If you have received one or more of these forms, please complete each one, no later than the time of response to the Office action being surveyed.**

The survey is intended to determine whether Office actions are perceived to be clear and complete on certain specific and important items related to patent examining practices and procedures. The results of the survey will be used in the development of Office training programs. The survey is a follow-up to the Patent Action Surveys conducted in 1991 and 1992. Where training is provided to address identified deficiencies in performance, follow-up surveys are intended to be conducted in the future to determine whether the training was effective enough to improve performance in the measured areas.

The Survey Form is brief and easy to complete and does not permit identification of the respondent or of the particular application involved. The Survey Form may be completed at the time of response to the Office Action. It is possible that a practitioner may receive many Office Actions containing a Survey Form during the survey period. To have results that are meaningful, the Office needs a high response rate. Therefore, it is **important** that patent practitioners complete each survey form **no later than the time of response to the Office action being surveyed**. To assure that this form is completed and mailed back to the address indicated on the Survey Form, it would be desirable for patent practitioners to have their office managers/docketing personnel take appropriate steps to keep the form and Office action together for the practitioner's benefit.

Your cooperation in completing the Survey Form is appreciated.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections. All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
